

# HealthOne

*Health ERP on SAP Business One*

THE BEST-RUN BUSINESSES RUN SAP

## Coordination of Care

- Adoption of electronic medical records
- Management of chronic patient conditions
- Intervention model to preventative care model
- Use of evidence based medicine to maximize resources

## Visibility & Transparency

- Changing conditions require clarity and insight
- Compliance with accrediting and governmental regulations
- Widespread patient choice in the system

## Effective & Efficient

- Service line management for better insight into care
- Financial pressure for cost reductions
- Close workforce control for maximizing impact on cost
- Efficient materials management function

# The Needs in the Healthcare Industry

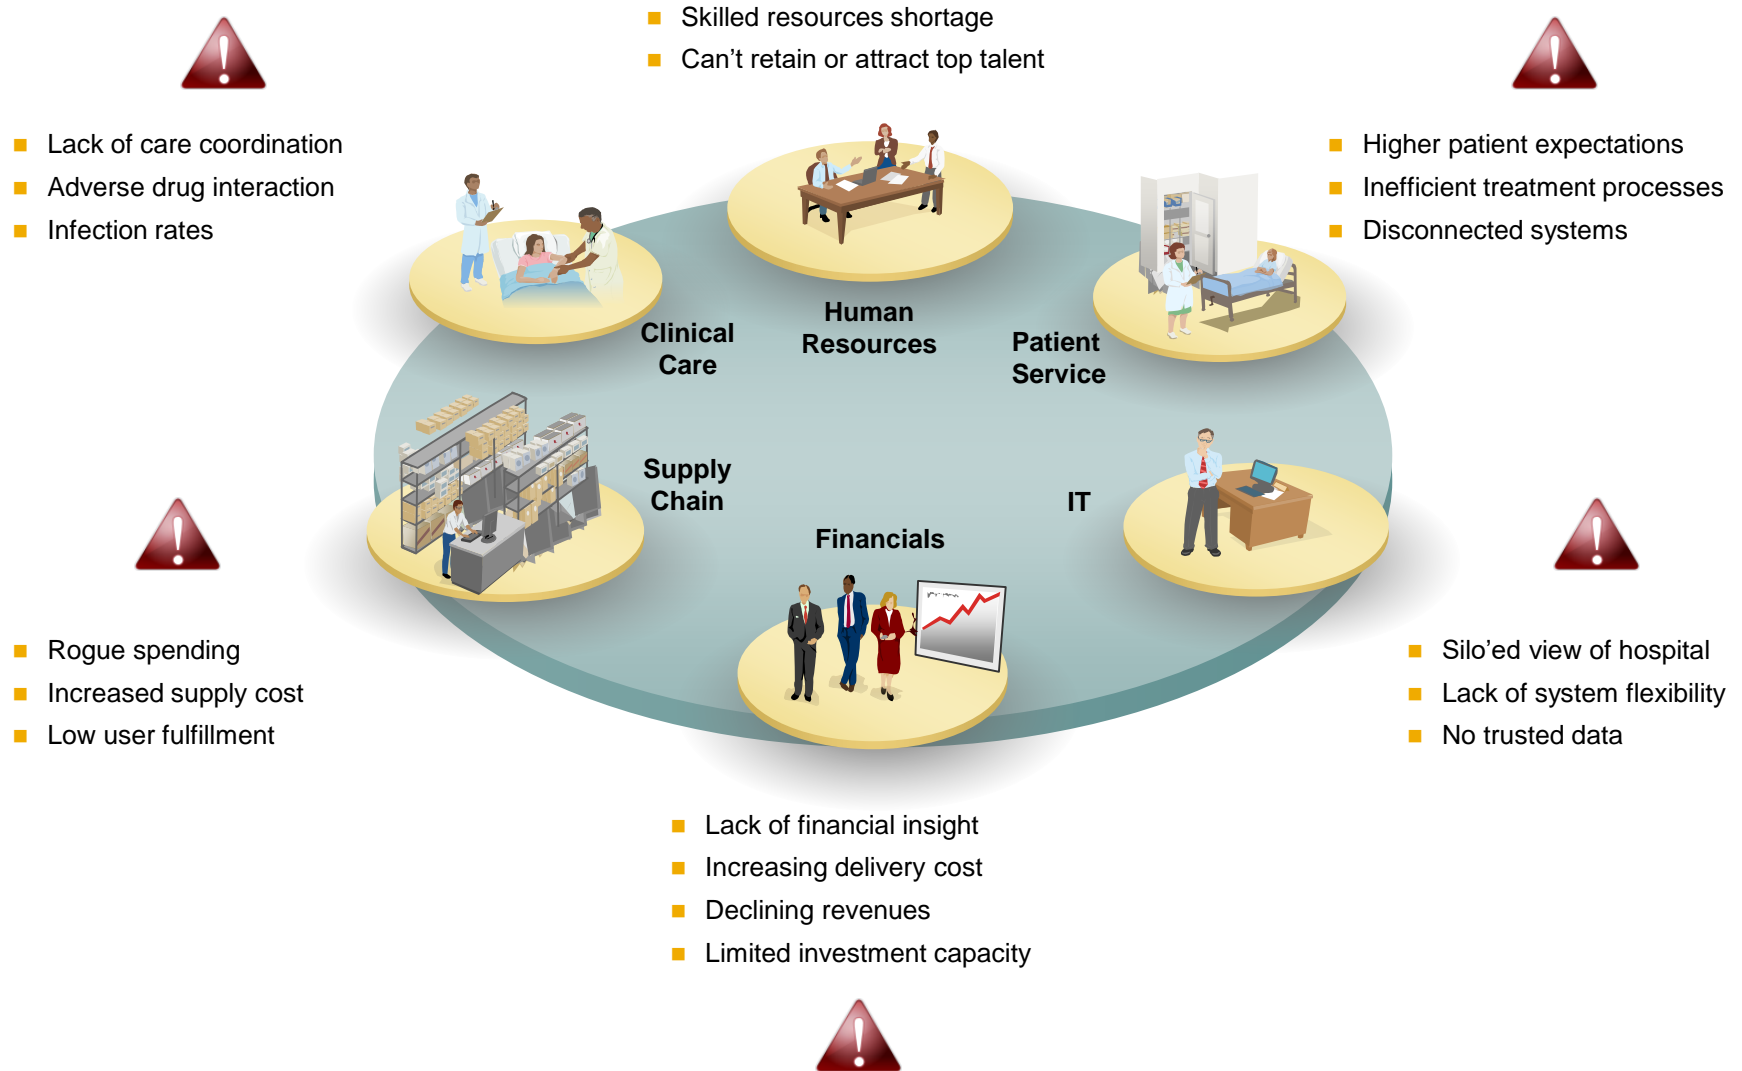

- **Deliver Superior Patient Care, while managing limited budgets**  
Understand better what patients need and when they need it.
- **Maintain Efficient, Effective Financial Operations**  
Automate finance functions to minimize costs and streamline financial processes.
- **Maintain Efficient, Effective Supply Chain Operations**  
Streamline supply chain operations to improve patient safety and service, while monitoring, controlling, and reducing costs by simplifying processes..
- **Optimize Resource Utilization and Contain Costs**  
Automate the supply chain and other labor-intensive processes of support staff and supply chain professionals to focus on their core responsibilities, rather than administrative tasks.
- **Strengthen Supplier Relationships**  
Optimize relationships with your most important trading partners through increased collaboration and mutual assistance

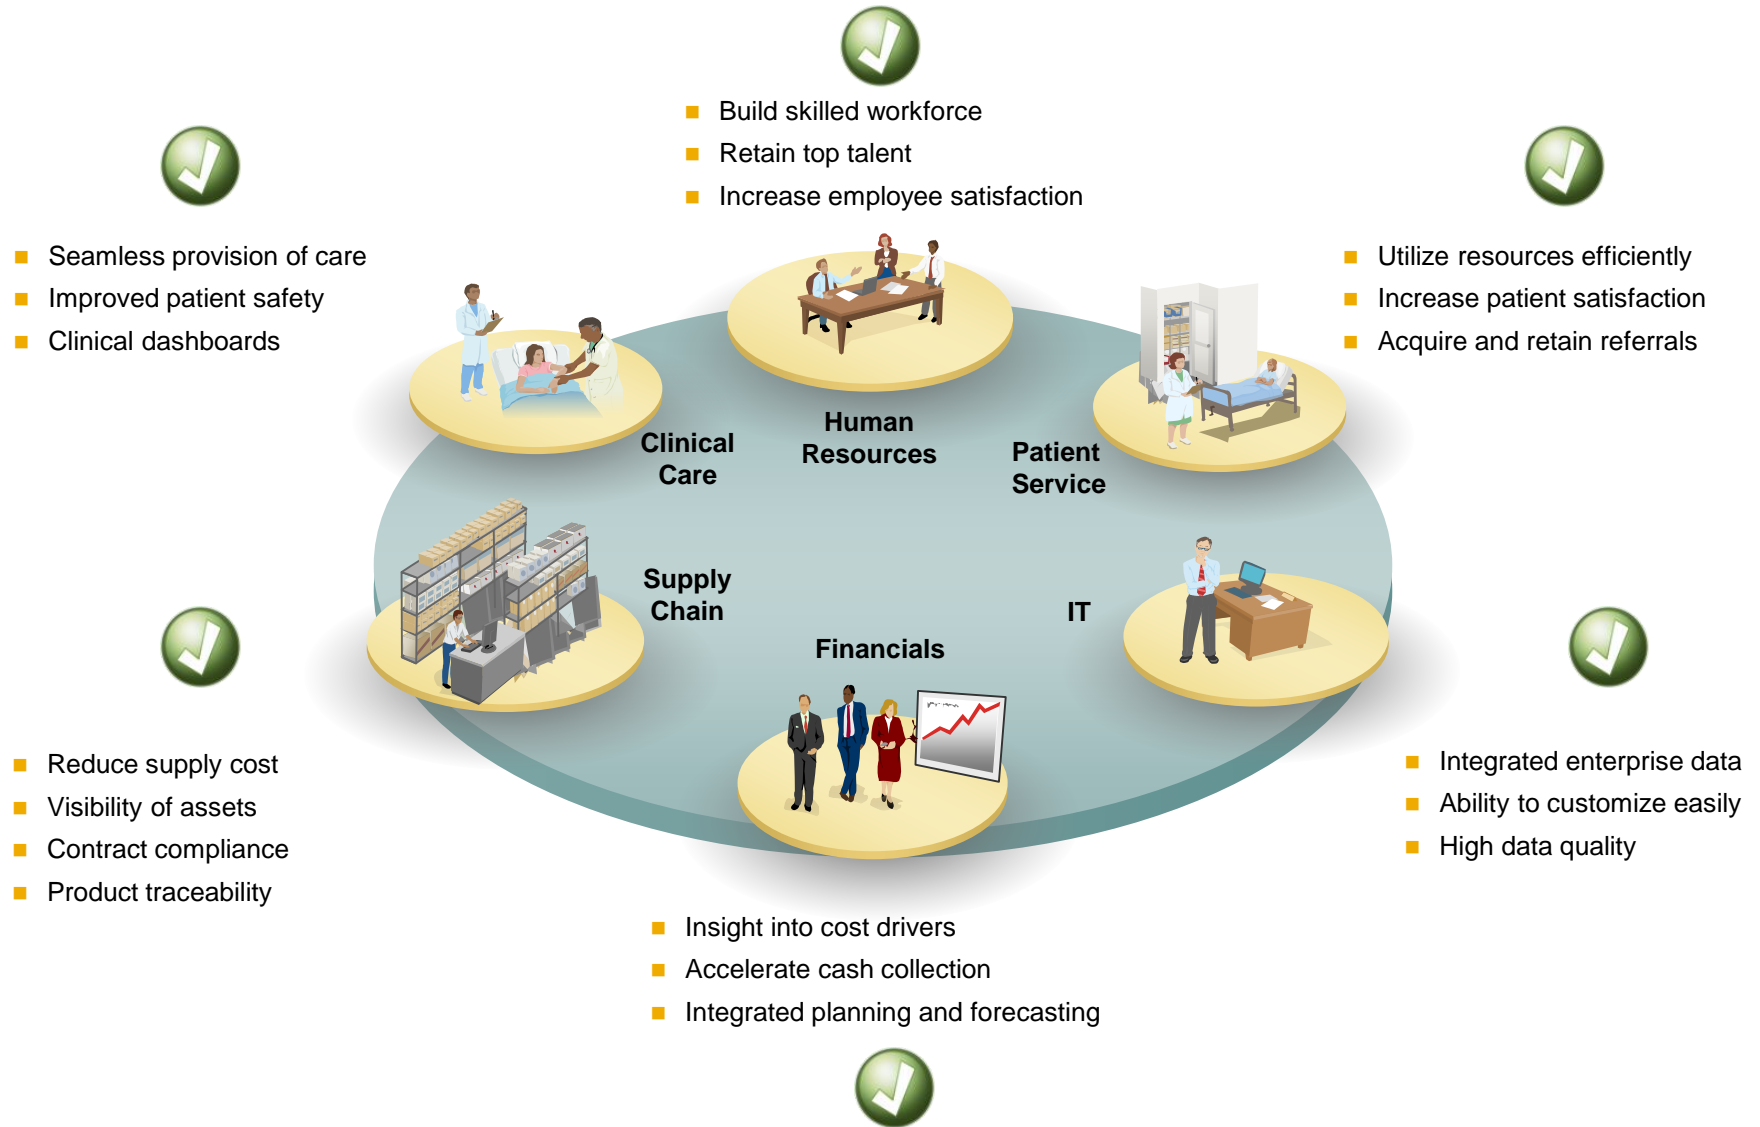

## Key Healthcare Executive questions:

- How do I increase patient satisfaction?
- How do I enhance treatment quality ?
- How do I attract a skilled work force?
- How do I grow employee productivity?
- How do I contain growing costs and expenses?
- How do I increase the operational efficiency?
- How do I attract and retain patients and doctors?

# Lack of Optimized Resources and Business Processes Reduces Patient Care Quality

# SAP and HealthOne Optimize Resources, Increase Service Responsiveness and Quality

# HealthOne, a central system to manage all your Medical Center

## ■ Integrates all critical functions

Manage your center from beginning to end all in one system

## ■ Including power of SAP

Integration of clinical modules in the most powerful ERP market, SAP Business One. With the tools used by the most efficient companies in other sectors

**SAP** Business One

# HealthOne. Features included

▶ 1

- Patients Records
- Agendas
- On line appointment
- Traceability
- Medical History
- Diagnostic test. Sender
- Surgery
- Nursing
- Scales fees
- Hospital stay
- Emergency

▶ 3

- Invoicing. Simple o collective
- Invoice reconciliation
- Provisioning.
- Economic Management
- Marketing/ CRM
- Financial Accounting
- Cost accounting
- Bank management
- Budgets

▶ 2

- Human Resources. Training
- Document management
- Pharmacy. Drug list integration
- Card connections
- Staff schedules
- Settlements of doctors accounts
- RIS/PACS, LIS integration

▶ 4

- Reporting
- Business Intelligence
- Balance Scorecard
- Warnings
- Activities
- Mobility. Iphone, Ipad, Android.

# HealthOne – Patients Datas

The record includes non-clinical data provide the basis for patient identification in the system. A system of multiple tabs allows categorize and separate information (socio-demographic, economic, etc.) also allowing its subsequent operation. Some of this information may be mandatory to register a new patient.

Among the many possibilities in terms of affiliation, you can define multiple categories, include photographs, patient documentation, etc. We can also view the status of their accounts, clinical processes that have treated you or to access their scheduled appointments, tracking, billing, cost allocations. etc.

# HealthOne – Web appointments

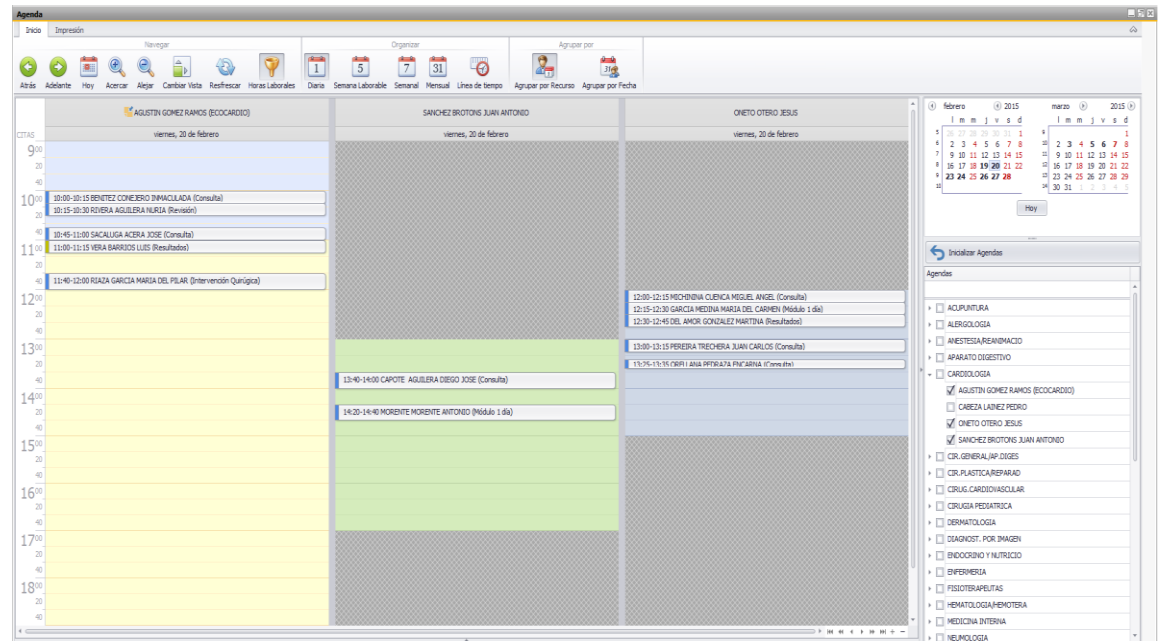

A screenshot of a web browser displaying the "Selección de agenda" (Appointment Selection) page. The browser's address bar shows a local host URL. The page features the Firsap SISTEMAS logo at the top left and a navigation menu with options: "Paciente", "Agenda", "Ver/Anular Citas", "Cambiar Contraseña", and "Cerrar Sesión". The main heading is "Selección de agenda" with a progress indicator. Below this, the patient's name "Paciente: Diaz López Pedro" and the branch "Sucursal: EL PASEO" are displayed. There are two dropdown menus: "Seleccione una agenda" with "URG. HOSPITALARIAS - URGENCIAS" selected, and "Seleccione un tipo de proceso médico" with "Consulta" selected. A blue button labeled "Ir a Calendario" is positioned at the bottom left of the form area.

Patients can request an appointment to the medical center through a website. They receive a SMS when appointment is accepted.

Authorized personnel will have access to your calendar and can view the appointments you have scheduled for a particular day.

# HealthOne – Agendas

The Appointment module allows complete control of outpatient programming and planning of operating rooms and other resources department. A totally intuitive, Outlook-like interface, facilitating adoption by the hospital staff.

The schedules system is designed so that each system user has access to the schedules that can handle, there are direct links to patient records as well as his record.

Users can register appointments, delete them and modify them. They can also drag them from one day to the next in the same agenda or from one agenda to another. You can block hours or days in the calendar by default or by exceptions. It includes a system of programmable warnings that can prevent the recording of an appointment if certain conditions are met.

# HealthOne - Traceability

The screenshot displays the 'Agenda' window of the HealthOne system. The interface includes a menu bar at the top with options like 'Archivo', 'Tratar', 'Lista', 'Datos', 'Buscar', 'Módulos', 'Herramientas', 'Ventana', and 'Ayuda'. Below the menu is a toolbar with various icons for navigation and actions. The main area is a table with columns for 'Historial', 'Ir Paciente', 'Paci...', 'Hora d...', 'Paciente', 'BT1', 'Sala de esp...', 'BT2', 'Entrada Co...', 'BT3', 'Salida Cons...', 'Agenda', and 'Ab. Clínico'. The table lists several patients with their respective appointment times and locations. A calendar widget on the right shows the current date as May 13, 2014, and a list of medical specialties is visible on the far right.

The system gives us full traceability of the patient over our facilities. Our employees have access to their patient tracking milestones. These data allow us to effectively manage internal costs and continuously improving the experience for our patients

Traceability of operating rooms allows us to control the timing of actions on patients and allocate the human and material resources used in each intervention.

The emergency department have their own traceability system for classifying patients by their degree of emergency. We can analyze wait times, the duration of treatment, the performance of the department etc.

# HealthOne – Medical History

This module manages in a unified way all the clinical information during the entire life cycle of the patient, making a true "**paperless hospital**" as possible.

The medical history includes, among many other features, protocols for monitoring the evolution of the patient and clinical course, management background, events management, issuing prescriptions, clinical trials, display results (analytical, diagnostic imaging, etc.)

Information is correctly structured around departmental level currently allowing the maximum degree of control and organization of the clinical history of patients.

The EMR is unique per patient, although it includes the set of medical specialties, in this sense, it can consist of a standard format, or it can be made entirely according to the medical center, based on models of History by specialty defined by the doctors teams. The Report Editor, included in HealthOne, allows you to easily design any type of report template required by the Medical Centers. It,s included a Form Designer to collect the clinical data required by any department of the center.

# HealthOne – Medical History

The screenshot displays the HealthOne Medical History software interface. The main window shows a report titled "Informe: URGENCIAS" for patient PILAR SIBON CAMINO. The report includes patient details, a list of medical history items, and a clinical course table. A sidebar on the left shows a navigation menu with categories like "Historia Clínica", "Nuevo Informe", and "Solicitar Prueba". A bottom panel shows a "Pruebas solicitadas" table and a "Seguimiento" graph.

SAP Business One

Monitoring the patient is very intuitive. All reports and evidence by department and date of completion are displayed.

# HealthOne – Diagnostic test

The screenshot displays the HealthOne software interface. At the top, there is a menu bar with options: Archivo, Tratar, Vista, Datos, Tra, Módulos, Herramientas, Ventana, Ayuda. Below the menu is a toolbar with various icons for file operations and navigation.

The main interface is divided into several sections:

- Historia Clínica (Patient History):** Located on the left, it shows patient details for "PILAR SIBON CAMINO". It includes a "Nuevo Informe" (New Report) section with a tree view of medical categories like ADMINISTRACIÓN, URG. HOSPITALARIAS, and PEDIATRIA.
- Documentos (Documents):** A central panel showing a list of documents. It includes a "Cargar Fichero" (Upload File) button and a "Cambiar Vista" (Change View) option. Below the list, there are buttons for "Añadir" (Add) and "Cancelar" (Cancel).
- Editor de Imágenes (Image Editor):** A large window in the foreground displaying two X-ray images of hands. A red circle highlights a specific area on the right-hand X-ray. The editor has a menu bar (Archivo, Editor, Formato, Opciones) and a toolbar with various editing tools. A "SALIR" (Exit) button is located at the bottom right of the editor.
- Table:** On the right side, there is a table with columns: Departamento, Nombre F..., Tip..., Proceso. It lists various medical departments and their associated processes.
- Bottom Panel:** Contains a date and time display (12/09/2016 16:44) and the SAP One Business logo.

In the patient history may include all types of diagnostic imaging and video evidence. The physician can visualize and edit.

The work shifts module allows you to plan the assignments of all the staff of the center and follow their incidents.

Detailed management of the allocation status of a service or worker.

Management of incidents of payroll and substitutions.

Includes configurable dynamic reports of assignments, personnel costs per service, holidays, exercised guards, etc.

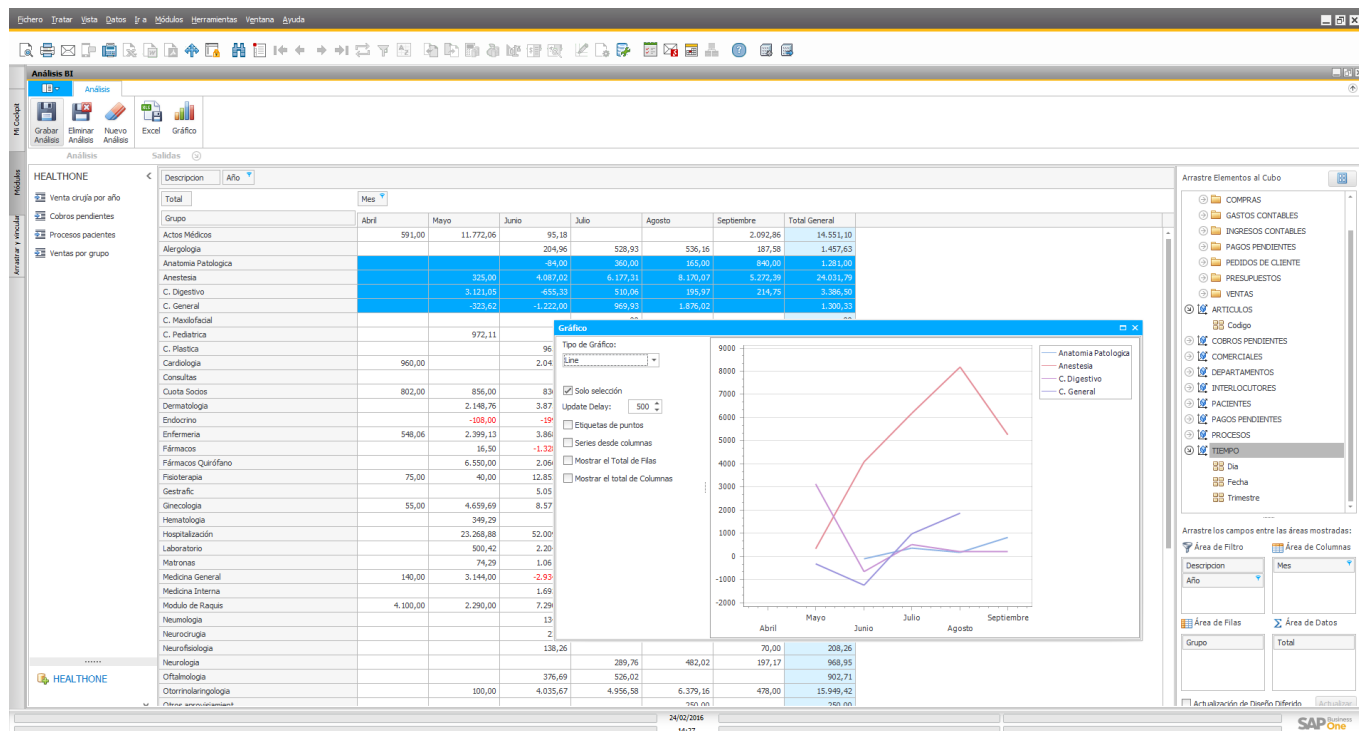

# HealthOne – Business Intelligence

Business Intelligence module integrated into a single data store all the strategic information of the Center, while providing an environment that is accessible fast, simple and friendly.

Allows a detailed analysis of clinical processes, billing, purchases, receipts and payments and even financial and cost accounting.

This module allows us to analyze actual data that is going on in the center, why it happened, and therefore predict what will happen to make appropriate decisions.

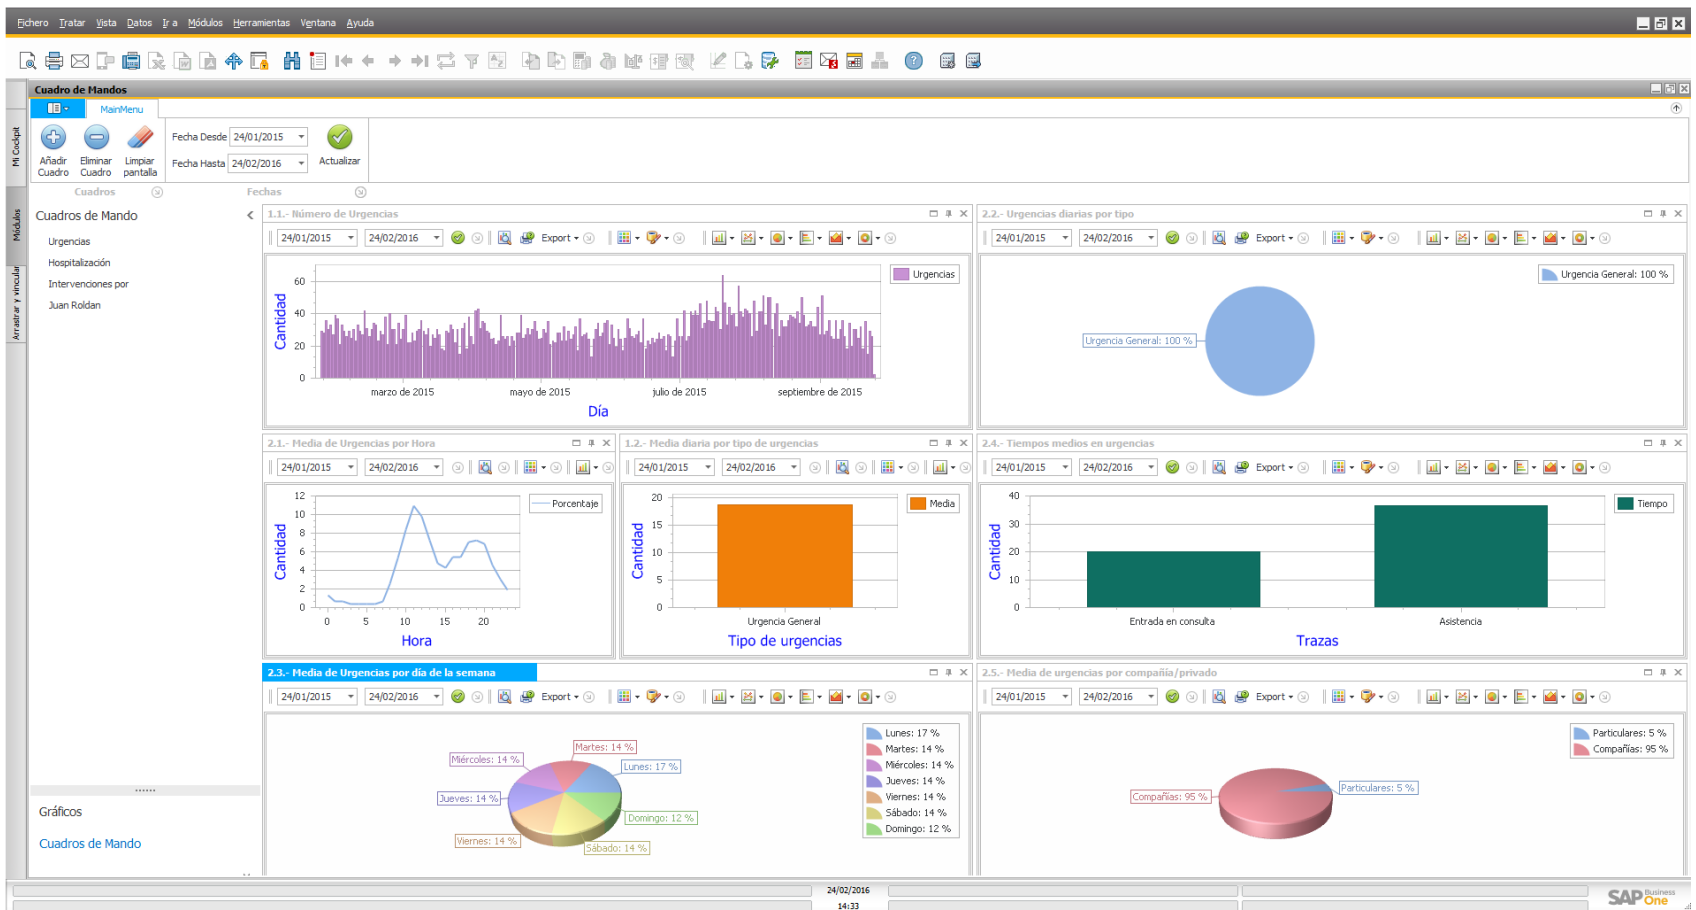

# HealthOne – Balance Scorecard

Dashboard module includes more than 50 types of charts and statistically significant for the medical center.

User can design and save dashboards, so that with one click you can analyze the state of its Center on welfare, economic, commercial area, etc.

# HealthOne – Invoice payments reconciliation

This feature allows you to check the state of payment of each lines included in the invoice we have sent to the paying companies. Each line of the invoice corresponds to a medical procedure performed on a patient.

# HealthOne – Scale Fees

HealthOne it includes management of price scales of medical acts to companies and physicians depending on the financial arrangement they may have with the center. Prices included in medical procedures are automatically set according to these scales. Alerts may include using SQL sentences.

The screenshot shows the 'Baremo' application window. At the top, there is a menu bar with options: Archivo, Tratar, Vista, Datos, Ir a, Módulos, Herramientas, Ventana, Ayuda. Below the menu is a toolbar with various icons for file operations and navigation. The main area contains a form for 'Baremo' with fields for 'Identificador' (1120), 'Cliente' (CESMA), 'Tipo de baremo' (Propio), 'Descripción' (CESMA), 'Tipo de cliente', and 'Activo' (checked). Below the form is a table with the following columns: Acto, Especialidad, Artículo, Grupo, Descripción, Precio, Precio Info, Compañía, Regla, Artículo Suc, Tipo Cliente, Regla Precio. The table lists various medical acts such as 'URGENCIAS', 'VISITA A DOMICILIO URGENTE DIURNA', 'CONSULTA', 'TRAUMAT. Y ORTOPEDIA', 'OTORRINOLARINGOLOGIA', 'CIR. PLASTICA/REPARAD', 'UROLOGIA', 'ENFERMERIA', 'CURAS O VENDAJES', 'CURA MEDIANA', 'CURA GRANDE', 'INJECTABLES', 'DIAGNOST. POR IMAGEN', 'CRANEO, SENOS, UNA PROYECCION', 'COLUMNNA COMPLETA (30 X 120). UNA PR...', 'ORTOPANTOMOGRFIA', 'MAMOGRAFIA UNILATERAL', 'MAMOGRAFIA BILATERAL', 'ANESTESIA/REANIMACIO', 'ANESTESIA GRUPO I' through 'VI', 'ESTANCIA EN PLANTA', and 'QUIROFANO GRUPO 0' through '5'. The 'Precio' column shows values ranging from 5,75 to 418,00. At the bottom of the window, there are buttons for 'OK', 'Cancelar', and 'Eliminar', and a status bar indicating 'Registro 1 de 39'.

Acto	Especialidad	Artículo	Grupo	Descripción	Precio	Precio Info	Compañía	Regla	Artículo Suc	Tipo Cliente	Regla Precio
08098	URG. HOSPITALARIAS	068.08098		URGENCIAS	70,00				[Vacio]

# How the system is implanted?

## Analysis

- Defining new development
- Inventory, interfaces, forms and reports
- Data conversion strategy

## Implement.

- Parameter setting
- Data migration
- Design and development
- Delivery of Prototype: identification of scenarios, scope and expected results
- Integration plan, testing and loads

## Final Preparation

- Productive Environment Facility
- User manuals
- Training
- Detailed implementation plan

## Go on and Support

- Reports Issue Tracker
- Support and troubleshooting
- Technical closure of project
